190*

Mr. Oscar E. Monnig
1010 Morningside Drive
Ft. Worth, Texas

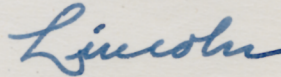

Dear Oscar:

Do you happen to know anyone who has a small specimen of DePort, Texas which they would be interested in exchanging (or selling)? The Institute of Meteoritics needs about an ounce for a destructive experiment, so borrowing is out of the question.

Did you notice what looked like a sprinkle of Bielids on the nights of November 13-19?

Best regards.

Sincerely,

Lincoln LaPaz
