

Palmer Lake Colo.
June 27 1935

Dear Mr. Hanning:

Your letter reached me here where I am cutting some meteorites, while my operator is otherwise engaged.

Yes there was an iron meteorite at Defort last year too late to get into "Over Star-Belted Planet". Two masses have passed thru my laboratory. They had been purchased by Harvard. Later I heard of another mass, probably the one you are offered now.

Yours,

H. H. Mininger
