TEMPORARY QUARTERS: 707 ANDERSON BUILDING
FORT WORTH, TEXAS
October 1, 1923.

Dear Y.M.C.A. Friend;

The contracts for this fine looking building in the upper left hand corner has been signed up - and excavating begun at the corners of Lamar and 5th streets to-day.

There will be Lueder stone up to the second story and then brick. It will be a building we will all be proud of-- as a partner in this enterprise you will be glad to hear that we have now begun actual operations.

Collections have been coming in fairly well; but now that the building has actually started we will need to collect in all the moneys due.

The contracts call for the building to be completed by August 1, 1924. It is, therefore, evident that payments must be made promptly to meet our obligations for material and labor.

We enclose you a statment of your pledge and the amount now due. A return envelope is enclosed for your convenience and we urge your co-operation in this matter.

In behalf of the Building Committee

Among G Catter
Chairman.
