

*In a few days, the Year 1924 will have become history—its joys and its sorrows, its pleasures and its disappointments will be a part of the past—never to return. While the Year has not been entirely without its unpleasant features, it is good to know that the Star-Telegram family is practically intact and that we are happy in our work.*

*For many years, it has been our pleasure to give our employes the opportunity for the enjoyment of Christmas by closing all departments and issuing no paper on that day, which custom will again be observed this year.*

*In addition, thereto, and not for its intrinsic value, may we ask that you accept a slight token of the Christmas Spirit, not as recompense for your loyalty and fidelity, but solely as evidence that these priceless qualities are remembered and appreciated.*

*May we continue mutually in 1925 and the years to come, to labor in the constructive work in which we are engaged.*
