Mr. Oscar E. Monnig,
1010 Morningside Dr.,
Ft. Worth 4,
Texas,

Dear Sir, -

I was under the impression you intended contacting me again while in Denver recently but as I did not hear from you I could not tell you about two meteorites I have that might or might not be of interest to you.

These are -

WESTON, CONNECTICUT: a small mass that does not show any outer crust. Weight, 28 $\frac{1}{2}$ grams. Has a small smoothed-off area. Aerolite.
ESTHERVILLE, IOWA: a mass with one polished face. Weight, 65 grams. Mesosiderite

I consider both of these, especially the first, of historical value, and am not anxious to sell either.

Prices are as follows - on the Weston stone, \$90.00; on the Estherville specimen, \$100.00.

Kindly understand that meteorites are not my line, nor do I pretend to know or care about so-called prevailing price levels. I merely have these two items that can be purchased, if desired, at the prices quoted - that is all.

These quotations are following through on a promise of mine made some years ago to let you know when I had any meteorites to offer you.

Sincerely yours,

E. M. Gunnell
