Mr. Feathergail Wilson
Placid Oil Co., Geology Dept.
3900 Thanksgiving Tower
Dallas, TX 75201

Dear Sir:

I was able to get a copy of your paper read to me, and was really intrigued by it. I am quite convinced that this is the real thing, but it may take further evidence to convince some of the hard heads in the academic fraternity of geologists!

Please keep me informed on any further developments, especially as to the Canadian worker who is trying to establish shock features in the quartz. Should you ever go down there, let me know so I could see if there is any possibility of going along.

Should I be in Dallas I will try to contact you. But since I do not drive the probability is not high.

I enclose copies of leaflets I formerly used in going out in the country and canvassing for meteorites, either in general or especially after a probable fall.

Sincerely,
