

1966, June 14

Mr. Oscar Branson,
Route 9, Box 807 A,
W. Ironwood Hill Drive,
Tucson, Arizona.

Dear Sir:

In the fall of 1964 I wrote you about a piece of an iron meteorite I had acquired from Mr. Walter Wright of Santa Fe, who said he traded for it with you.

The only locality information I had was that this came from a larger piece on a ranch near San Luis Potosi.

I would surely like to have more precise and detailed information, and hope you will now be willing to furnish it. I am an amateur meteorite collector, and no meteorite is worth very much without something of a "pedigree".

If you feel you could perhaps secure the entire mass and want to correspond with me about that, I would also be glad to hear from you. However, Mexico has a law against the exportation of meteorites, I understand, so I hardly think that would be feasible.

I do hope you will now respond, and I attach a stamped envelope.

Sincerely,
