Dear Oscar

Have a few minutes between change of flights in Fort Worth. The hour is so early in the morning I did not have the nerve to phone you. However I felt like it because I just recovered a 640 pound stony meteorite up in New Mexico.

Well call it Clovis because it was recovered about 3- to 4 miles south east of there. It's a very old fall.

Possibly you have had some news about this because there was some news in the news papers up around Muleshoe.

Hope you and your wife are well and will be visiting Washington some of these days.

Cordially yours
Ed.
