

1963, August 17

Dr. Donald P. Elston,
Geological Survey,
Branch of Astrogeology,
Box 1906,
Flagstaff, Arizona.

Dear Dr. Elston:

I was very pleased to hear from you, but thought nothing of the delay because I know you have an over-full agenda and then I knew, too, you were moving. I hope you gradually get things settled, both as to your work and personally.

If you and Dr. Shoemaker come to Sierra Madera this fall and are able to visit either the Spade Ranch structure or the Hico and Wilbarger County sites, nothing would please me more than to be able to join you. I think Mr. H. H. Morse here (I believe you met him at Hico) would be most delighted to be in on the trip. I would have no plan to drag any one else in.

I do hope you can give me as much advance notice as possible as I would not want to set up any conflicting plans. I shall possibly go to the Meteoritical Society meeting in Ottawa in early October. On the other hand, let me make it most clear that if our presence would interfere with your schedule or work in any way, don't hesitate to say so because we would not take it amiss. I know you have your work to do on such field trips.

You may keep the prints I sent you on the Spade Ranch formation; they were copies and need not be returned. (I hate people who send me things with instructions to send them back!)

Sincerely,

Meteor of _____
