

1963, May 3.

Mr. Sam W. Bishop,  
Humble Oil and Refining Co.,  
Midland, Texas.

Dear Mr. Bishop:

Mr. W. J. McBride of Dallas has been sending me copies of his correspondence with you and I am quite pleased you are willing to join us on a week-end look at the "Cup and Saucer" near Colorado City.

On April 27th you wrote you were free every other week-end counting this week end. I am not certain but interpreted this to mean you could go May 11-12. I have tentatively set that date aside and ask that you kindly let me know whether this is satisfactory. If not, set another week end and we will work towards such date as you name.

Bill McBride can come over here and drive out with us on a Saturday morning, I hope; we could meet you there that afternoon or Sunday morning, as you choose. He said he did not think he would try to bring his family in response to your kind invitation. I may bring a friend or two of mine along and we plan to furnish the car from here.

I am not one of those fellows who thinks every circular formation was made by a meteorite. In fact, I rather doubt whether this is a meteorite crater. But it does intrigue me, and I am anxious to hear your comments about it in any way.

Yours sincerely,

cc W. J. McBride,  
9735 Lanward Circle,  
Dallas 18, Tex.
