Mr. Herbert V. Schulz,
3017 West 11th
Irving, Tx. 75060

Dear Sir:

I have put an exhibit of meteorites in a glass case in the main entrance hall of the Science Building at Texas Christian University here, at the invitation of the geology department there.

The Cranfills Gap stone found by your father would add to the display by showing an example of a stone with very good thumb marks, as they are well developed on that specimen.

I called this morning to see if you would be willing to lend us the meteorite for this exhibit, and your wife tells me you are still working for the government on Navy contracts and are gone on business for several weeks.

If so happens I shall be out of town, too, for a couple of weeks, so there is no hurry about answering. But on your return I hope you will consider this request favorably and let me know. Phone, if you prefer: residence (evenings) 293-0349; or during the day Mon-Fri at the store (Monnig's) 332-7211, Ext 287.

Thanks.

Sincerely,
