

1971, Feb. 26

Mr. Herbert V. Schulz,
4115 Shoreline Drive,
Dallas Texas

Dear Mr. Schulz:

Are you there? I haven't been in touch with you since the middle of 1969, and do trust you are still living in Dallas.

I don't ~~hesitate~~ to tell you that I am still most interested in the meteorite you have, and I remain hopeful that you will negotiate with me on it some day. At least please don't let anybody else get ahead of me on it, and be sure to keep it in good shape because it is a nice specimen worthy of care and preservation.

There was a fresh fall in Oklahoma at a little place called "Lost City" early in January of 1970, and an unusually large number of pieces of a rare type (carbonaceous chondrite) in Australia Sept. 28, 1969 but others bright ones occasionally don't seem to yield anything.

Yours most sincerely,
