

1965, June 2.

Mr. H. V. Schulz,
2402 Sinclair St.,
Midland, Texas.

Dear Mr. Schulz:

I contacted your brother Carroll here in Ft. Worth back in February, and talked to him about the piece he had knocked off the meteorite. He said he had been unable to find it when he moved from Dallas, so I got his Dallas address and in April went by there. I have alerted the present occupants of the house to watch for this piece, as it might show up some day in the flower beds or the alley; they did not recall having ever seen anything like it.

Then I finally managed to get by to see your father in early April and had a nice talk with him, urging him to keep in mind the possibility of finding another piece some day. On this trip I also talked to a Mr. Olson just down the road and he was quite receptive (C. O. Olson, I think). I didn't have much time on that occasion, but got a chance to go back just a few weeks ago and had a nice long visit with your father and mother both; we met a Mr. Alfred Olson there that day, and I talked to Mrs. Rogstad down the road, but didn't get to meet him. We also talked to a Mr. and Mrs. John C. Lund, who live in the old schoolhouse. I'll go back and canvass the neighborhood some more gradually, as there is always a chance of bumping into another related meteorite—or some other meteorite, for that matter.

I would still like to hear from you further about the one you have. Let me know what you want for it—or maybe we can make a deal with your saw thrown in. I still am anxious to know the weight and get a little chip for classification. Won't you please accommodate me on these two points at least?

Yours sincerely,
