

2-2-65

Carroll Schulz JE 6-5843 thinks piece he knocked
off was large - found 2-3 lbs. + tho he searched thoroughly
for it before he moved from 508 Brookhurst Dr in Dallas
he could not find it. He works for Mondra Calculators.

1965, January 31

Mr. H. V. Schulz,
2402 Sinclair St.
Midland, Texas

Dear Mr. Schulz:

I was disappointed not to get the little chip of
your meteorite I had asked you for before going to New York.
I had hoped to take it with me and get it classified while
there. I have put the meteorite on the records in two of
the principal museums.

I hope you are still willing to send it to me and
will, and that it was merely the rush of other things that
made you put it off.

I am also still desirous of getting the correct
weight of the main mass and of the sm piece you have, if
possible.

I learned from your sister Wilma here that your
brother Carroll is now in Ft. Worth. I am going to phone him
and see if by any chance he knows where the piece is that he
originally took to Dallas to test for radioactivity. I know
there is only one chance in a million.

I have not yet been to the Bosque County location
but I have a piece of ranch property near Crawford and I go
down there about once a month, and go right thru Clifton.
On my next trip I hope to get over to Cranfills Gap and meet
your father.

Sincerely,
