Linson Texas

Sept. 12 - 36

Mr. Oscar Monnie
Ft Worth

Dear Sir: I am enclosing check for another
years subscription of your "Bulletin" - I enjoy it
very much and want to keep it coming.
I did not receive the Sept. issue and thought
perhaps my subscription had run out
What was found out about the "Oklahoma
Sun set Fire Ball" - I suppose I owe you an
apology for the poor information I gave on
it but I - could do no better, - when I saw
this meteorite - I took measurements artificially
style - using a match: which to me is (when
held at arms length is equal to approx. 5°)
and with ^a longer stick took the distance etc
and then [^] took the number of match length
on the longer stick and arrived at the conclusion.
I admit this is very crude but when a thing like
this Fire ball shows up one does not have much
time to prepare for taking exact measurements.
I talked to one of our engineers and told him what
I had done and what I wanted but he was busy
and could not be with me on the spot at that
time and further added that I would probably
make the readings conform to what I had in
mind and that it would be a very hard thing

to get exactly. - I thought it over and the
more I thought ~~about it~~ that he was right
so I let the first crude information go in,

If you see a thing like a ^{in day light} meter, and later
try to remember, exactly where it was it is some
thing to puzzle over. - so that was that, hope
you will see my position in this case and
excuse my inability.

Yours truly
C B Carroll

414 E Woodard St

PS

Best wishes to you and your associates
I would certainly like to have some
one interested around here to talk to,
as it is I feel like a lone wolf - up
here - and that is one reason I like
your Bulletin so much.

Choctaw

Choctaw

Choctaw

But ever to you and your
I would certainly like to have
one interested someone for to talk to
as it is I feel like a hand and
free - and that is our hope I like
your particular so much.
