

Lowell, Okla.

Jan. 26, 1937

Dear Mr. Menning:

I am sending you a rock I found in a field about a half of a mile west of where Eddie Johnson found his meteorite. It has been showed to quite a number of people that saw that other piece and they said it looked like it. After I found it I thought it looked like a piece of coal and tried to burn it over an oil stove but it would not burn.

Out of all the rocks I found

this is the only one that looks
like a meteorite and I put
in about 300 lb. of wheat and
looked as I went over the
ground. If I am fortunate
enough to find a piece I will
sell it if you want it. Please
let me know promptly
whether this is a meteorite.
If it is not I want the
rock returned.

Yours sincerely
A. W. Cutter
