

Sent 1947 fascicle

1949, June 23.

Dr. Franz Hillen,
Heppen/Ems,
Wall 9,
Prov. Hannover,
Germany.

Dear Sir:

I appreciate very much your detailed letter of April 23 offering me the piece of the meteorite "Emsland". Pre-war prices for many slices in this country were about 10 cents a gram on an average, and allowing for inflation and other factors I would be willing to pay \$25.00 for this 110 gram piece.

Please let me know if you wish to sell it for this, and also if you have determined how I could make payment. I can send a draft on the Chase National Bank of New York.

The photographs are excellent and interesting. I hope I may keep them, but if you want them returned, let me know. I enclose some postage reply coupons which may repay you to some extent for your trouble and postage.

I am Secretary of The Meteoritical Society, and have charge of distributing its publications. We issue a set of reprints each year containing articles on meteors and meteorites, and I will gladly send you a few of these at no charge if you would be interested.

Yours most sincerely,

*Meteorite received about 8/15/49
Receipts ack 8/21 + 1948 fascicle sent.*
