Germany.

Dear Sir:

Last summer I had my relative Mr. Joseph Mönnig advertise in "Orion" for meteorite samples that I might purchase.

He sent me your answer in which you offered a 200 gram piece of one showing Widmanstaetten figures.

Will you please give me some detailed information about this? Is it polished and etched, in good condition, and from what fall or find does it come?

Please indicate what price you would want for this. Is trading now permissible, and would a check drawn on the Chase National Bank of New York be cashable by you? Or would some other arrangement be necessary?

Yours most sincerely,

*If proposition accepted, have him indicate value of meteorite + value of cutting etc separately.*
