Houston, TX 77058

Dear Dr. McCoy:

Dr. Meenakshi Wadhwa, our new Meteoritics curator, was here about two weeks ago and one the things she had asked me to process is your loan for the Bluff meteorite.

Under separate cover, I am sending you specimens of Bluff: Me 173, 10.78g fragments taken from a big polished slab that originally weighs 10,948g and Me 1461, 11.26g fragment taken from the 16.54 lbs (7522g) individual. The second one is the specimen which you suspect to be Cedar (Kansas).

I hope these materials will be useful in your research.

Sincerely yours,

*Clarita M. Nuñez*
