Dear Mr. Monnig:

I am sure you have received my letter saying I was unable to locate any of the meteorites you were interested in. Later found the one labeled as a piece from Floydada, Texas.

You stated in your letter that you would pay a liberal price for the meteorites. Since I have only one at present, what would be your price. Much better to have an understanding, if the price is satisfactory, will send you the meteorite and you may send the money when you have received the meteorite.

Very truly yours,
