Mr Oscar Monning
1010 Morningside Drive
Ft Worth, 4, Texas

Dear Sir:

Thank you indeed for your gracious letter--your visit was my pleasure and very informative.

Thanks also for the trouble you have entailed concerning my German camera. I did not intend for you to go to such trouble on my behalf. Below, the information as best I can furnish;

Markings on lens--
Schneider-Kreuznach Xenon 1;1,9/40
Nr 2052511

Make-- Robot
Speed-- 1/2 to 1/500 Synchronized

Features--Built in --wind up motor; Right angle view --35 mm Range calibrated in Meters.

Will take approximate 50 exposures--Film must be rolled onto German cassettes.

Leather case and tri pod included.

Also included --Bertram Standard German light meter with instruction book. Instruction book also with Robot camera.

Model: Robot 11

I think about \$75.00 for the Camera, Case, Tripod, and light meter would be a fair price but honestly I have no knowledge of it's value. Naturally, I would warrant the camera to be in good condition.

I again say I appreciate your trouble. I have relayed the value of Silver to Mr Eldred. I will continue to watch for an opportunity to procure the Meteorite for you.

Thanks again.

Your friend,

Wilson Smith
