“Business is Excellent”
 in one-half of Fort Worth’s trade area
—and “Business is Good”
 in the other half of the territory served by and
 serving Fort Worth

— this according to Forbes Magazine for June. The factors which entered into the survey upon which this condition was based are agriculture, industry, employment, trade, money and credit conditions.

—and not only this—Fort Worth and its Trade Territory have been in the “white spot” on the business map continuously for the past two years.

No wonder Fort Worth’s trade area (West Texas) is considered the best “try-out” territory in the United States for any marketing campaign.

The Star-Telegram and Record-Telegram has more circulation than any other three papers combined in West Texas.
