

Had some one found the stone and brought it up
in back of the house where you picked it up?
If so, do you know who first found it, and how
long ago? I am interested in when it was first
discovered, and how far from there it may have been
picked up the first time:

*I don't know how the stone got there. It was claimed to have been there for some time. I gave the check to Mr. Smith - he was perfectly satisfied with the sale.
yours truly,
W. D. Redick*
