24th May 64.

Dear Mr. O.E. Munnig,

As you can see the meteorites have now left.

There is an old man MR. Zeller residing here at Windhoek, who was the original finder of these meteorites, and was the Government geologist in the German times. He also wrote pamphlets on them, but I have been unable to procure a copy for you, as it was so long ago, and he is today almost 90 years of age. He states that they are of nickel and cobalt origin, and the locality are the farms GANAUS and Kameelhaar just outside the Gibeon Gebiet.

In case you want to sell one, I have been able to procure another roundish one from the same locality, but really had to pay for it. So the price of this one, if you are interested will be two dollars a lbs. I haven't weighed it as yet, but I think it will scale 400 lbs.

I would be pleased if you would establish payment for same now, as soon as you can.

I did send you the invoice per earlier letter, and must be sure you received it. If not write immediately and I will send you another.

Kind regards,

yours faithfully,
S. Pieters.

Cofy
