

1973 Aug 12.

Dear Mr. and Mrs. Wright:

This probably will not reach you till you return, but it will serve to thank you for the most enjoyable time we had the day we met you for lunch. We thoroughly enjoyed the company, the meal and the place!

I enjoyed seeing the nice set-up you have at your home. It bespeaks a lot of work on your part.

Walter, the next time you see Dr. Montgomery tell him about our using his Jeep and express our appreciation. Of course the main thanks go to you for piloting it over and back and up and down the mountain! My wife got a kick out of my pictures in Glorieta and up on the hill.

I wrote the Wilson's and sent them a copy of the pages on "Glorieta" from O. C. Farrington's book on North American meteorites. I shall hunt up the article by La Paz on the one he got more recently from that fellow Ortiz whose house we visited but missed. Then I'll send them a copy of that (and maybe I never sent you one--I'll try to remember.)

I think I heard Wilson say he knew of an old house up in the region northwest of Canoncito. If he could locate it and it turned out to be the one near which the original finds were made we could begin to get a line of flight by connecting that locality with the one found by Ortiz.

I hope you will have (or have had) a wonderful trip.

I have a report of a 15 pound "black rock, silvery on the inside", non-magnetic found just north of here and I'll go see it in a day or two but I fear it's an artificial product or slag from the place where it was found, near railroads and principal highway.

Sincerely,
