Dear Glenn

While I was with you I forgot to reply to your letter of 10 July in which you asked if we have any records of a stone falling near Mangaratnam? Madras, India in 1814. It is possible that your report refers to the Gurram Konda fall. This is poorly documented and I should appreciate any further details you have of the Monnig specimen. We have 8g. of this stone and I would much like to have a 'probe section of the Monnig material for comparison.

I very much enjoyed my stay in Denver, thank you very much for all your hospitality.

With best wishes,

*Andrew.*
