The University of New Mexico
Albuquerque, New Mexico 87106

Dear Art:

We very much appreciated your hospitality while we were in Albuquerque. A good dinner and excellent company. Hope that your visit to Iceland was up to expectations.

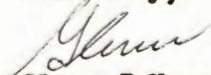

When we got home, I found that one of your specimens, # M376.1, part slice of an unidentified stone, was sitting on a shelf in the vault. I will send it when I get the piece of Brenham refinished. Probably in a couple of weeks. We have been having our kitchen remodeled so things have been torn up and much behind.

Enclosed is a copy of a letter from Andrew Graham. The specimen that he refers to is # M379.1, unidentified stone from India. I have told Andrew that I would forward his request to you. It may be a good chance to identify this specimen and a good excuse to make a thin section from it. If you find an identity for this specimen, let me know what it is.

We hope that you will still plan to visit us one of these days.

With best wishes,

Sincerely,

Glenn I Huss
