Mr. Oscar E. Monnig
29 Chelsea Drive
Fort Worth, Texas

Dear Oscar:

Harrington

Under separate cover we are returning to you the ~~Harrington~~,
Tennessee, iron which you spoke to me about in Odessa last fall.
The shop has polished and etched the cut face on this specimen.
I hope it arrives in good condition because it has a very attractive
structure.

This is your specimen which was sent for study. I hope to get
on to some of these iron meteorites when some other things slack off,
and get out a description of them. Enclosed is a picture of a thin
cut removed from your specimen which you may enjoy having.

When the Harrington arrives, please sign, date, and return the
white copy of the enclosed shipping invoice for our records.

With kindest regards, I remain.

Cordially yours,

Ed.
