

1950, May 6.

H. H. Nininger,  
American Meteorite Museum,  
P.O. Box 1171,  
Winslow, Arizona.

Dear Mr. Nininger:

Last fall when we were having some correspondence about the iron from Hartman, Tennessee, which you had confused mentally with Clinton, Tennessee, it was my understanding you had a lead up there on a specimen you were not able to get action on. I offered to try thru some friends of mine in that region to get it for you.

In your letter of Dec. 9 you said you'd be glad to let me try to do this for you, but you overlooked the little detail of giving me any information about this lead.

If you have a specific name and address of some one who supposedly has or knows about a meteorite in the Chattanooga-Knoxville region, send me all possible information and I think I can get some action for you.

Yours most sincerely,
