

1950, May 6.

Miss Ella Royall,
Moran, Texas.

Dear Miss Royall:

I was looking over some notes I took a couple of summers ago when at Haskell, Texas, where I got a meteorite of some 78 pounds from a farmer there who had found it years ago.

I note I have a reference to the fact that you saw a large meteor that lit the entire countryside when you were a child, making cattle run away, and that you thought perhaps it landed near there.

I wonder if you could give me more specific details about this?--such as the time and date more exactly, names of other witnesses, direction from you when it was last seen, and so on.

The enclosed circular on meteorites should be of interest.

Yours sincerely,

Oscar E. Morney
