Prof. Richmond Bronaugh,  
Dept. of Geology,  
Baylor University,  
Waco, Tx 76703

Dear Sir:

Last spring I was too late to get an article in your school paper inquiring about the Hawkins meteorite. Do you think we could <sup>get</sup> something like the enclosed run now?

If you prefer to hold this until I come down there again, just do so. I have a copy.

I come to the store about once a month and hope to drop by to see you one of these times. If you would care to arrange for a talk to some of your geology students or some other helpless victims, I would try to perform again--but I hope it would be a new group.

Sincerely,
