Mr Oscar Monning

Dear Sir: -

Received your letter of the enquire of the
Meteorites in this area.

Though I have not looked for meteorites in
particular I usually take notice to unusual stones.
I have not seen any thing that resembled what
the picture shows. I have found some stones
that fits most of the qualification you
have listed but they were only petrified
wood, heavy, dull black, redish brown on
inside, but porous with celicone crystals
in them. I know of no one that has
found a meteorite in this area, thought
some have been reported fallen back in
the 30's.

Thank you for you letter
Yours Otho.
