

1972 Nov. 6

Mr. Bill Bain,  
9739 Kemp Forest  
Houston, Tx 77055

Dear Mr. Bain:

I appreciate your enthusiastic reply to my inquiry about the meteorite Dr. Hawkins had. I did not answer immediately because I was leaving on a late vacation trip to the West Coast, and I have been snowed under with work since my return. In business I run the wholesale store of Monnig Dry Goods Co.

If you are ever in Ft. Worth, by all means contact me. I am usually at the office, 1621 Main St., a six story structure at Main and Lancaster (right on the freeway) from 8 to 5 weekdays except Saturday, or you can call me at my home at night or week-ends.

I think I have run into the "other man" you mentioned, an archaeologist named Curtis Tunnell according to one of the persons I wrote. I have traced his address in 1970 as Box 12276, Capital Station, Austin, where he was then on the Historical Survey Commission, and have written there to see if I can run him down. Maybe he knows and will tell us something.

Up to now I have established nothing, but there is a trend in the replies to indicate the find was from the Turkey-Quitaque region or not too far away, and as I said before, probably before 1951.

Sincerely,
