Mr. Oscar Monnig
29 Chelsea Drive
Fort Worth, Texas 76134

Dear Mr. Monnig:

This morning I visited with Mrs. Hawkins. She had heard from her elder son and he knows nothing of the meteorite. It is my guess the other son will know nothing about it, either.

Mrs. Hawkins wants to discuss disposition of the meteorite with her sons when they are next in Waco—they usually visit her about once each year. In the meantime she says that the meteorite will be cared for properly. She expressed her interest in seeing the meteorite placed where it will best serve. I'll hazard another guess: that the family will prefer placing it in the museum at Baylor.

Bryce Brown (curator of the museum) found the old label for the Brenham, Kansas, meteorite and a new sign has been placed in the display. He is concerned now as to the whereabouts of the Bluff meteorite.

We will be glad to see you any time you can come by. Please give our regards to Mrs. Monnig.

Sincerely,

Richmond Bronaugh
