

1-16-47

Dear Oscar,

I certainly was glad to see you Tuesday. I am studying the 10/1/17 lost fireball, and it is very interesting.

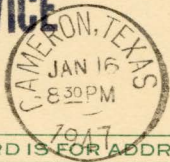

Do you know if anyone has ever searched about 10 miles northeast of Menard or the road between Menard and Eden.

I don't see how Dr Udden figures the meteor went from NE to S.W. all I get is a path from around Nixon over Fredericksburg and on to a point NE of Menard, traveling SE to NW. I feel there are two fireballs involved, possibly 5 years apart. Will write in detail later.

Gene
