

PITCAIRN
autogiro

A. E. ZEISKE

~~XXXXXXXXXXXXXXXXXXXX~~

DALLAS, TEXAS

July 31, 1938.

Mr. Oscar Monnig;
Ft. Worth, Texas.

Dear Mr. Monnig:-

I have received both your card and the bulletin. Let me assure you that if you ever wish to borrow it again, I shall be glad to lend it to you.

Let me know when you come to Dallas, if for a lecture or otherwise. I have an erudite friend with whom I should some day like to visit your observatory, and shall of course get in touch with you previously.

Your brief remarks about your trip to the site of the supposed meteor of Oct. 1, 1917 are very interesting. Some day when things open up with the autogiro, I have been thinking what a convenient way it would be to visit such places from the air. I once spent an hour or so atop the "enchanted rock" 18 miles north of Fredericksburg. This place is naturally inaccessible to cars and even horses I suppose, but an autogiro should be able to land there with ease and take off again too.

Moreover, flying over territory like that it should be possible to see things which would be invisible from the earth, and which, however close to frequented parts might yet have been overlooked entirely.

I hear the dinner bell ringing, so must close. Looking forward to the time when I shall be able to see you and talk with you, I am

Sincerely yours,

Arnold E. Zeiske
