## 6th ANNUAL INTERNATIONAL RELATIONS WEEK

"The Soviet Union Today" will be the theme of the Mar. 6-8 event which will feature three nationally-known political scientists in a series of lectures under sponsorship of the Forums Committee. Purpose of the "week" is the broadening of the student body's awareness of world problems. All sessions will be free and open to the public and will be held in Ed Landreth Auditorium.

Dr. John S. Curtiss, professor of Russian history at Duke University and former exchange professor with the Institute of History, Academy of Sciences, in Moscow, will deliver the initial address at 7:30 p.m. Monday (Mar. 6). The former research analyst for the Office of Strategic Services will discuss "Main Streams of Soviet Economics."

Russian-born Dr. Serge A. Zenkovsky, professor and director of Russian studies at Stetson University, will speak on "Soviet Foreign Policy" at 3:30 p.m. Tuesday (Mar. 7). Reared and educated in Germany, France and Czechoslovakia, the former Guggenheim fellow has authored a number of books dealing with religious and political issues of Russia.

Final lecture of the three-day program, scheduled for 3:30 p.m. Wednesday (Mar. 8), will be given by Dr. John G. Stoessinger, executive officer of the doctoral program in political science at the City University of New York. "The Russian-Chinese Split" will be the topic of the Austrian native, who was forced to leave his homeland in 1938 because of the Nazi occupation. After fleeing to China via Siberia in 1941, he was with the International Refugee Organization until he came to America in 1947. His book, The Might of Nations: World Politics in Our Time, won the Bancroft Prize by Columbia University in 1963 as the best book in international relations published the previous year.

The Forums Committee, assisted by such able persons as John Bohon, Frank Reuter, Comer Clay and John Haltom, have scheduled three top speakers capable of seeing the current problems and possible solutions in dealing with the Soviet Union. The program should be of widespread interest and is sure to draw many from the community to join with the faculty and students in attending the three sessions.

1966-67 ENROLLMENT SETS NEW RECORDS...TOPS 10,000

Looking over Calvin Cumbie's analyses of our 1966-67 enrollment shows that for the three sessions included (Summer and Fall 1966, and Spring 1967) we had a total of 10,308 separate students. "This is a record high for an annual session," reports Calvin, "and the first time enrollment has reached the 10,000 mark." We've been close before and, in fact, enrolled 9,829 students during the 1965-66 sessions. This year's record high is an increase of 479 students or 4.8% over last year.

A quick review of this year's sessions shows that for the Summer 1966 we enrolled 3,576 students, 324 or 9.9% over last year and a new record for a Summer Session. Day schools increased by 159 (7.8%) over 1965, Graduate School increased by 90 (14.3%), Evening College was up 77 (15.2%), and Brite decreased by 2 students (2.0%).

For the Fall semester 1966, we again hit a record high for a Fall term, with enrollment reaching 7,340, an increase of 108 students or 1.4% above Fall 1965 when the top had been 7,232. Undergraduate day schools and colleges increased by 216 students (4.7%), Grad School was down by 30 (3.4%), Evening College was also down--by 50 (2.9%) and likewise Brite had a decrease--by 28 (19.5%).

For the current Spring Semester, enrollment is 7,040, an increase of 368 students or 5.5% over 1965--and another record high. Undergraduate day school enrollment is 4,353, 77 students or 1.8% more than last year; Graduate School enrollment is 837, an increase of 8 students (0.9%); most significant increase was in the Evening College--up 293 (20.3%) for a total of 1,730; Brite is down 10 students (7.6% over 1965) for a total of 120.

STUDENTS OF MANY FAITHS FROM AROUND THE WORLD

Calvin's report shows that 63.5% of our annual enrollment is from Fort Worth and Tarrant County. Specifically--5,723 from our fair city, 819 from Tarrant County other than Fort Worth, 2,713 from other Texas counties or 26.3%. The remaining 10.2% come from outside the State of Texas. All but one state was represented--New Hampshire. Students also come from 30 foreign countries and US possessions .

Thirty-eight religious groups are represented among our student body, with the Baptists still in the lead with 2,335. Methodists are next with 2,083 and Disciples third with 1,395. Bahai, Buddhist, Moslem, Quaker, Mormon, Salvation Army, Holiness, Greek Orthodox, Church of England, United Church of Canada are among the church affiliations represented.

BUSINESS MANAGEMENT DRAWS MOST STUDENTS

The 1966-67 study reveals that the top field of interest for men students is Business Management with 733 majors. An additional 96 women have selected it as their major. Closest contender is History which has 163 men majors and 120 women. Following in popularity among men students are Biology (145), Accounting (129), Government (124). Top major among the women is Elementary Education with 603 girls (and 12 men) preparing for teaching at that level. Second is Nursing which attracted 315 women (and 8 men). Third among majors selected by women is Home Economics with 226. An interesting note is that 265 men and 230 women were "undeclared", with no major preference at this time.

\*\*\* \*\*

WALLACE AND TEAM TO BE HONORED

Jewell Wallace of physical education and the members of the 1941 El Paso high basketball team he coached to a state championship will be honored at the Mar. 2-4 Boys' State Basketball Tourney in Austin. The former dean of men began his coaching career in El Paso immediately after earning his B.A. here and earning athletic letters in three sports. Only two members of the 1941 Tiger cage team, which defeated Mount Vernon, Jeff Davis of Houston and Abilene to win the crown, will not be in Austin. Wallace may have two more such events coming up since his 1943 San Angelo gridgers and 1948 San Antonio teams also won state football championships.

YOU'LL HEAR THAT "BIG BAND SOUND" TUESDAY

Sponsored by the TCU EX-Bandsmen Association, next Tuesday's (Mar.7) "Big Band Sound" program will feature director-composer Richard Franko Goldman of New York as guest conductor of the TCU Symphonic Band in concert. To begin at 8:15 p.m. in Ed Landreth Auditorium, the musical program will include compositions by the guest artist, in addition to several numbers he commissioned.

Dr. Goldman now conducts the world-famous Goldman band founded by his father 50 years ago and which initiated the Guggenheim series of concerts held each summer in New York City's Central Park. In addition to conducting the 95-member TCU band, Dr. Goldman will lecture to music students on campus and meet with music faculty.

Tickets for the third annual program, priced at \$1 for adults and 50 cents for students, may be purchased at the band office and from band members. Proceeds will be used to enrich the band program at TCU by bringing other internationally-famous guest conductors, artists and composers to campus.

THREE NEW PROGRAMS ANNOUNCED ✓

A newly-announced \$11,400 grant from the U.S. Department of Health, Education and Welfare will provide support for graduate traineeships for persons working toward master's degrees in speech and hearing therapy. As described by speech department chairman Dr. George Tade, the awards, which are effective in September, will be available to persons accepted to the University's Graduate School who hold undergraduate degrees in speech and hearing therapy. Each award will carry a \$2,000 stipend and free tuition. Dr. Dorothy Bell, who heads the Speech Correction Clinic, will coordinate and direct the traineeships, which will complement graduate programs in other areas of speech specialization.

Mar. 10 is the deadline for applications for special education traineeships sponsored by the Texas Education Agency. Announced by Dr. Wyatt Stephens of TCU's special education division, the awards are planned to help teachers now employed on temporary certification and those who will be assigned as teachers of special education classes in the Fall of 1967. The program marks the first time such TEA-sponsored grants have been available at church-related institutions. Recipients of the traineeships will have \$450 stipends plus tuition for a six-week session this summer.

The third program is one especially designed to prepare individuals to become effective teachers of English in the modern elementary school. To provide four two-year prospective teacher fellowships as authorized under Title V (C) of the Higher Education Act of 1965, the work leads to an M.A. degree with a major in English and elementary teacher certification. Dr. Sandy Wall will direct the program. The fellowships provide support for up to two years, with a \$2,000 stipend for the first year and \$2,200 for the next year, with \$400 allowance for each eligible dependent.

))))---((((

TELETE LAWRENCE INVITED TO PRAGUE

Mrs. Telete Z. Lawrence, University speech therapist, has been invited to present a paper at the Sixth International Congress of Phonetic Sciences in Prague, Czechoslovakia, Sept. 7-13. The event will be attended by persons from throughout the world who are involved in voice and speech science. The first representative of TCU to participate in the triennial conference, Telete will give a paper on "Certain Phonetic Tendencies Perceived in the Idiolects of Selected Native Texans."

En route to Prague, she will attend the 10th International Congress of Linguists in Bucharest, Roumania, Aug. 28-Sept. 2, and she will be an observer for a portion of the First International Congress of The Association for the Scientific Study of Mental Retardation Sept. 12-20 in Montpellier, France.

EDUCATION: THE SHAPE OF THINGS TO COME

The Feb. 13 issue of The Wall Street Journal quotes Frank Bowles, one of the Ford Foundation's top education specialists, "We are now founding colleges at the rate of 20 or more a year....that within 10 years we will be founding them at the rate of one a week." The article reports on a Census Bureau forecast indicating the U.S. schoolage population (5 to 24) will swell to more than 125 million by the year 2000 from 70.2 million at present. Instruction will change, too, with the stress on flexibility, electronic teaching aids, disappearance of rigid class levels, and use of the computer as the key to individualized education. Teaching machines will drill youngsters in arithmetic, grammar and reading skills, grading correcting their mistakes instantly. TCU will soon take initial steps in doing research in the areas of computer-assisted instruction.

Learning will become a lifelong process. "We are in the early stages of a technological world that is going to require essentially all people to have to go to school continually to stay abreast of the changes," says Harold Clark, professor of educational economics at Columbia University's Teachers College. The president of Educational Facilities Laboratories, Inc. says, "It is apparent that education will be the new dynamic of our national economy--that learning is the new growth industry."

Many planners predict, reports the article, that more and more communities will concentrate all levels of school facilities in centrally located "educational parks." This would eliminate duplication of costly facilities and allow top teachers to reach larger numbers of pupils. Most authorities think that within the next 20 years compulsory public schooling will begin at age four and continue through the equivalent of two years of college--with an increasing number of the latter attending junior or community college. This may cause many universities to drop their two lower years and others to add two years or more of graduate study in specialized fields. Postgraduate universities to explore the frontiers of knowledge will spring up. Undergraduate enrollment is expected to reach 15 to 20 million by 2000, up from 5.5 million currently. Graduate students are expected to number between 2-2.5 million by the close of the century, compared with 520,000 today.

Commenting on the uneven distribution of Federal support to a "clique of big-name universities," Earl McGrath, director of the Institute of Higher Education at Columbia U. Teachers College, estimates 10 top schools (including MIT, Harvard and U. of Cal.) obtain nearly 40% of the funds. One hundred universities--out of a total of 1,100 four-year institutions in the U.S.--receive all but 10% of Federal money.

The survival of the smaller private university may depend largely upon aggressive, imaginative leadership, a vigorous faculty and academic program, facilities to meet increasing needs, and the ability to adapt to change. Says Milton Eisenhower, president of Johns Hopkins, "It is questionable whether private philanthropy will continue to support as many private institutions as it has up to now."

BOOKS BY BARBARA WARD AVAILABLE

Two books by British economist and author Barbara Ward, who will appear on TCU's Select Series Mar. 9, are now available in the University Book Store. They are "The Rich Nations and The Poor," and "Nationalism and Ideology." Both are in paperback editions and sell for \$1.25 each. Miss Ward will speak at 8 p.m. on the above date in Ed Landreth Auditorium on "The Unity of the Free World." One of the most influential writers in England, she was former foreign affairs editor of The Economist of London.

\$\$\$ \$\$\$ \$\$\$

TULLY MOSELEY RECITAL RE-SCHEDULED

For a number of reasons, several of the events printed in our 1966-67 Frog Calendar have had to be changed. Tully's recital is listed in the calendar for Wed., Mar. 8, but has been cancelled for that date and reset for Wed., April 19. You may want to note the change so you'll be sure to attend the program. Tully is a master pianist and we're privileged to have him on our music faculty. The recital will be at 8:15 p.m. in Ed Landreth.

#####

SCHWANDA PERFORMANCE SUPERB!

Last Friday and Saturday evenings' performances of "Schwanda, The Bagpiper" were testimony again to the ability of our Fine Arts faculty and students to present a production of superb professional quality. It was a credit to TCU and should have been a real treat to those from campus and community who attended. J. D. Sutherland's set designs were beautiful in their simplicity, color and appropriateness, as were the costumes. Ryan Edwards as "Schwanda," Kathryn Dacus as "Dorotka," Ira Schantz as "Babinsky," and Michael Connally as "Satan" were especially good in their roles and they sang beautifully. Other credits must go to conductor and musical director, Fritz Berens, stage director Henry Hammack, chorus director Bev Henson, choreographer Fernando Schaffenburg, and to the students who not only performed but assisted greatly in producing the folk opera. And a special thanks to the Fine Arts Foundation Guild of TCU who sponsored the program.

() () () () ()

CAP, GOWN AND HOOD FOR SALE-- Mrs. George McCowen, widow of former accounting professor, would like to sell these items as a group or separately. Dr. McCowen's robe is for the Doctorate in Accounting. If interested, call her at WA6-2800.

CAMPUS INTERVIEWS

R. B. Wolf, director of Placement Bureau, Student Center, announces the following companies will have representatives on campus during the week of Mar. 6th to interview our graduating seniors:

- Mar. 6 - Armour Grocery Products Co.- Business & Liberal Arts majors
- Mar. 6 - Procter & Gamble Co.-Business & Liberal Arts majors
- Mar. 6 - Haskins & Sells- Accounting majors
- Mar. 7 - Texas Electric Service Co.- Accounting & Business majors
- Mar. 7 - Schlumberger Well Surveying Corp.--Math, Physics, Geology majors
- Mar. 7 - Alcon Laboratories, Inc.- Accounting majors
- Mar. 7 - Camp Longhorn--All majors
- Mar. 8 - Royal Globe Insurance Companies-Business & Liberal Arts majors
- Mar. 8 - U. S. General Accounting Office- Accounting majors
- Mar. 8 - Lockheed Electronics Co- Math and Physics majors
- Mar. 9 - General Foods Corp.--Business & Liberal Arts majors
- Mar. 9 - Southwestern Bell Tel. Co.- Business and Liberal Arts majors
- Mar. 9 - Prudential Insurance Co. of America - Math majors
- Mar. 10 - C.I.A.- Business and Liberal Arts majors
- Mar. 10 - Leonards Department Store- All majors
- Mar. 10 - Philco Corp--Physics and Math majors

\$\$\$ \$\$\$ \$\$\$

FUNDS APPROVED FOR URBAN AFFAIRS PROGRAMS

The Coordinating Board, Texas College and University System, has approved \$29,000 from its 1967 appropriation under Title I of the Higher Education Act for programs at TCU. The funds will support the continuation of TCU's urban affairs programs offered through the Special Course Division of The Evening College in cooperation with the North Central Texas Council of Governments and for seminars for civic leaders. The University will allocate matching resources and channel funds previously appropriated for the programs to provide in excess of \$44,000 toward their second year of operation.

%% %%% %%%

SECOND RECREATIONAL SWIMMING COURSE OFFERED

A course in swimming "for fitness and for fun," taught by Daniel Murphy-- design engineer for GD and instructor of ARC and competitive swimming-- will begin next Tues., Mar. 7. The course, which was first offered in January, will consist of six sessions, meeting each Tues. from 6:30-8 pm through April 11. Offered through TCU's Special Course Division, the course will include water safety methods, water skills, drown-proofing and stroke techniques, recreational or competitive. Faculty and staff are invited to participate. The instructor will try to cover any phase of water skills the class desires and students can work at their own pace under Murphy's direction. Tuition is \$10 per person. To register call the Special Course Div. at ext. 387 or 388.

FACULTY BULLETIN/8

TEACHER INTERVIEWS - Dr. Leslie P. Evans, Director, Teacher Certification and Placement, announces that the following schools will have representatives on campus to interview graduating seniors during March:

Mar. 1 - Pearl River Public Schools Pearl River, New York (secondary teachers only)	10 a.m. to 12 noon
Mar. 1 - Sacramento City Unified Schl. Dist. Sacramento, California	10 a.m. to 4 p.m.
Mar. 1 - Midland Indep.Schl. Dist. Midland, Texas	8:30 a.m. - 12 noon
Mar. 2 - Inglewood Unified Schl.Dist. Inglewood, California	1 p.m. - 4:30 p.m.
Mar. 2 - Roslyn Public Schools Roslyn, New York	8:30 a.m. - 12 noon
Mar. 6 - Clark County Schl. District Las Vegas, Nevada	8:30 a.m.- 12 noon
Mar. 7 - Austin Indep. Schl. Dist. Austin, Texas	8:30 a.m. - 4 p.m.
Mar. 7 - Los Angeles City Schools Los Angeles, California	8:30 a.m. - 4:30 p.m.
Mar. 8 - El Rancho Unified Schl.Dist. Pico Rivera, California	8 a.m. - 4:30 p.m.
Mar. 8 - Moreno Valley Unified Schl.Dist. Sunnymead, California	8:30 a.m.- 12 noon
Mar. 9 - Corpus Christi Indep.Schl.Dist. Corpus Christi, Texas	9:00 a.m.- 11:30 a.m.
Mar. 13- Mojave Unified Schl.Dist. Mojave, California	8:30 a.m.-4:30 p.m.
Mar. 14- McHenry Public Schools McHenry, Illinois	8:30 a.m.- 12 noon
Mar. 15- Rowland School District Rowland Heights, California	8:30 a.m.- 4:30 p.m.
Mar. 15- Monrovia Unified Schl.Dist. Monrovia, California	8:30 a.m. - 4:30 p.m.
Mar. 15- South Bay Union Schl.Dist. Imperial Beach, California	1:00 p.m. - 4:30 p.m.
Mar. 16- Houston Indep.School Dist. Houston, Texas	8:00 a.m.- 4:30 p.m.
Mar. 16- Merced City Schl.Dist. Merced, California	1:00 p.m. - 4:30 p.m.
Mar. 17- Township of Madison Pub. Schools Cliffwood Beach, New Jersey	8:30 a.m. - 12 noon
Mar. 17- Albuquerque Public Schools Albuquerque, New Mexico	8:30 a.m. - 4:30 p.m.
Mar. 17- Spokane Public Schools Spokane, Washington	8:30 a.m.- 12 noon

"If interested in an interview with any of these representatives, please sign in the Interview Book, Room 211 Bailey Bldg., Teacher Placement Bur."

BOOKS NEEDED FOR DORM LIBRARY

Students in Tom Brown Dormitory are anxious to start a dorm library and would be most happy to have any books which faculty members might like to contribute. If you have a spare volume or so on the shelf you'd like to provide for the pursuit of knowledge, please leave it (or them) with Paul Wassenich, Betsy Colquitt, or call student Buzz Crist at Tom Brown Dorm (ext. 327) and he'll arrange to have the books picked up.

??? ??? ???

ANYONE HAVE A 1929 HORNED FROG ANNUAL?

Betty Jean Stocker, asst. director of Alumni Affairs, would like to obtain a copy of TCU's 1929 yearbook. She'll even pay cash! If you know the whereabouts of one of the books, please call Betty Jean at ext. 208, or drop her a note at the alumni office.

\*\* \*\* \* \*\* \*

NOTES ON MOST NOTABLE FOLKS

The March issue of The Texas Outlook, the professional journal for Texas teachers, will carry an article by PORTER CROW on "Moving the Future into the Now." (Any suggestion on how we can move some of our "nows" into the future?) Porter's fine article deals with many of the concerns of teaching which were discussed at the recent teachers' retreat.

Speaking of the folks over in Education, KEITH TURKETT attended a program planning session of the Southwest Educational Dev. Lab earlier this week in Baton Rouge.

Campus friends were saddened to learn of the death last Friday of Mrs. Sylvia Emmett, mother of Mrs. BERTHA HENRICHS of the Research Foundation office.

Dr. RUTH TOWNE, asst. professor of religion at TCU from 1946-56, died Feb. 24 in a Philadelphia hospital. The 56-year old Idaho native was supervisor of Christian education for a Lubbock church before coming to TCU. At the time of her death she was assoc. professor of elementary education at Temple Univ.

WAYNE LUDVIGSON of psychology has achieved what may be a "first". As co-author of a note in Psychonomic Science, he criticized the conclusions drawn by other authors from an experiment. Not that criticism is so unusual, but in their reply the "other authors" stated they were in full agreement with the criticism. That's bound to be a "first."

FACULTY BULLETIN/10

Washington may have its Lady Bird, but TCU has its own ANNA "B".WALLACE. Our lovely, hard-working director of admissions, was the honored guest and speaker at the Feb. 16 meeting of the TCU Women Exes of Houston. The group was celebrating their 20th anniversary and Anna Byrd was a founder and first president. Displayed were the minutes from the initial session and all the yearbooks since then. In other speaking engagements, Anna Byrd is serving as consultant at the North Texas Counselors Conference at TWU today. She'll speak to the Lake Worth PTA on Mar. 6.

BEN PROCTER of history and D. WAYNE ROWLAND, journalism chairman, were among the speakers at the Texas Junior College Teachers Assn. convention in Dallas recently. Ben spoke on "The Social Scientist: His Philosophy." Wayne talked to teachers about "Junior College Journalism: Diagnosis and Prognosis." Wayne also spoke to members of Theta Sigma Phi recently on "Philippine Journalism."

About 200 members of the Fort Worth Anglers Club heard CLIFFORD MURPHY of biology speak recently about his research at Benbrook Lake. Two of our graduate students assisted in demonstrating equipment used in the research.

BEV HENSON and our A Capella Choir were among those persons caught in Chicago's paralyzing snow storm last month. They were in the windy city to present a concert, but with the opportunity to cancel because of the snow, Bev gave our students the choice of singing to whomever might attend or having a night on the town. The choir members said they had come to give a concert and so they did...to 23 people. According to Bev, they sang the entire concert and all the encores to the stout-hearted audience that cared enough to come despite the snow.

ART EHLMANN of geology is back from a trip to Michigan State, McMaster and Northwestern U. where he gave seminars about his research on "Sediments of Puerto Rico." Art spent two days working with a co-researcher on mineralogic and geochemical aspects of tropical weathering of rocks.

A tip to faculty and staff who might wish to pass on a program suggestion to local clubs: DON REYNOLDS, new man in education who is in charge of the computer-assisted instruction program, is available to speak on the subject to service clubs, professional groups, PTA's, etc.

EARL GARDNER of biology visited Catholic High School at Tyler Feb. 20 as a representative of the Texas Academy of Science Visiting Scientist Program.

Biologist ROBERT PARKER spoke at the 11th annual meeting of the Biophysical Society in Houston recently on "Molecular Composition of Invertebrate Skeletal Structures as Influenced Through Phylogeny and Environment."
