

1957, May 29.

Dear Dr. Henderson:

Here is a copy of the copy you sent me on the "Comptes Rendus" article concerning the White Crust, now to you and me, Kaufman, Texas, meteorite. I have the original French text if you want it, but can't conceive you need it.

I think I have also mentioned that the meteorite referred to in "The Amara Meteorites of Feb. 12, 1875, by Gustav Detlef Hinrichs, marked on the title page "St. Louis, Mo., U.S., Carl Gustav Hinrichs, Publisher. New York and Leipzig, Lemcke and Buchner. London, H. Grevel & Co., Paris, H. Le Soudier. 1905". If the Library of Congress doesn't have a copy, I have one I can lend you. References to the Kaufman are herein on pp. 98, 99 and 101.

Sincerely,

P.S. I am now in touch with a daughter of the J. J. Hill of Kaufman who originally had the stones, but doubt whether anything of importance can be found out there.
