

Dear Oscar,

In regard to the  
Kirbyville stone of 1907,  
Mrs Julia B Smith of Cameron  
Recalls about 40 or so years  
ago, she was in bed sick  
when she heard an explosion  
and looked out her window  
and saw a ball of fire going  
straight down ending at  
about 10° altitude due east.  
She said it was late in  
the evening, possibly twilight.

Notice she has the sound  
first. Does the time of  
day correspond with the  
Kirbyville meteorite?  
It could possibly have been  
the 1910 meteor she  
saw. P. H. Co-  
Hortense Gene.
