Kirbyville Texas

Jan. 14 1935

Mr. Oscar E. Morning.

H. Worth Tex

Dear Sir.

I have what

I believe to be a meteorite

It is about the shape
and size of a pear and
brownish in color except
on one end it is black
smooth shiny color and
is heavy to its size.

It was found about $5\frac{1}{2}$
miles north of Kirbyville close to
the old Roganville Road

Yours Truly

Wallace H. Windham
