

CURRENT SCIENCE - SCIENCE and MATH WEEKLY

Editorial Office, 55 High St., Middletown, Connecticut

Dear Oscar:

Ann just back from Kansas...with the MAYDAY chondrite in her possession...its in perfect condition. This so you won't run up looking for it next week.

Will send some slides of it in a few weeks. How is the Belle Plaine coming on?

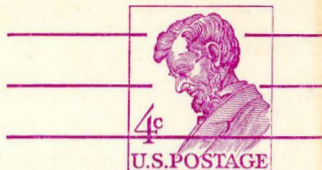

See you at Ottawa? I got to go o.k.

Now on track of a specimen up in Maine that I learned about during the eclipse.

Luck,

Scott
