

mailed 6/14

Route 1
McKinney Texas.
June 12th, 1937.

Dear Sir:

My neighbor that
lives on the next farm east
of us has a meteorite. It is
of the same stony and metal
type as the one I found. But
it isn't shaped like it.
It is shaped something
like this  and weighs
two pounds.

Mr. Rob Furr is the man
name that found it. He said
for me to write you about
it. If I had known it thirty
minutes earlier you could
have gotten it while you
were down here. He found
it before you all went back

toward McKinney but didn't quite know whether it was a meteorite or not, I think it is probably a piece of the same one I found.

not met 7/3/37
Artificial cast iron piece

yours truly,
Wayne Caster

I went visiting this evening, and heard that a boy living about a mile east of me has two pieces of a meteorite.

I haven't seen them but think probably he may have some.

Say: That picture I drew doesn't look much like the meteorite. It is shaped more like a cake of hand soap.

old marble
