

Okla

5-18-1913 H. W. Bruce of Meers, Okla., sent in 2 or 3 lbs. of what was found to be melted or heated ("Roasted") meteoritic iron; he asked for a check to one of the Lawton Banks and apparently lived near Baker's Peak, where he may have found the specimen. He forwarded his specimens thru the Hon. Scott Ferris, Representative, and refused Merrill's offer of \$5 for the roasted iron. Apparently all but 1 or 2 small fragments were returned to him. Wrote 1939 3-24. *Moved; left no*
