

Mrs John Laza
Mereta Texas

recd 4/15/43

1. Give size of meteorite (either by comparison with some common object or by giving dimensions in inches).

Better than average potato ^(sweet) size.

2. About how much does the meteorite weigh?

Three pounds or more.

3. Is it all in one piece or broken?

One piece.

4. Would you be willing to send it to me so I can see it before making you a price? I will guarantee to pay you a satisfactory figure or to send back the meteorite.

Could you give me a rough price estimate?

5. Who first found the meteorite and when?

My son, Edward. About two years ago.

6. Where was it first found and how?

In the field (Sudan patch). He happened to pick this object as he was bringing the cows to milk.

7. Was it found on a farm or on a ranch, and if possible give name of survey or other exact information as to where found.

Farm. A small patch or strip of cultivated land out in the pasture near by a creek.

8. Was it first found on the surface of the ground or dug up?

On the surface.

9. Any other information:

My son is in the armed forces now and would like to get in touch with him about this ordeal.
