Dear Sir:

38° 03.3

Your letter of March 30 received and the "quad" that you have is needless - The meteorite was actually found in a very inaccessible canyon no way in until these boys cut a Jeep trail down a sheer canyon wall - <sup>(800ft)</sup> three reliable witnesses to the fact that it was found there.

The pilot refused to fly it out and the finder had to come back in a Jeep after it - a 14 hour trip.

Best regards

Porter Rankin
