

1960, July 17

Dr. E. P. Henderson,
U. S. National Museum,
Washington 25, D. C.

Dear Dr. Henderson:

Thanks greatly for the two prints of pictures of the Moab, Utah, iron meteorite, which arrived in good condition Saturday. I appreciate having these. I took a few simple flash shots in color before sending it to you, but knew they couldn't be very good because I did not have the proper diffused lighting.

On receipt of your letter some days ago, and in view of all my evidence from other sources likewise seeming bona fide and of a confirming nature, I went ahead and bought the specimen.

As you get more data on the object I shall be gratified to hear from you further.

Yours sincerely,
