Apr: 7-1946,

Mr. Oscar Morning:
Ft. Worth, Texas!

Dear Sir:

Some ten days ago I was in a doctor office for treatment and ^{happened} to notice a peculiar rock lying on a table and I asked him what kind of a rock it was and he said I don't know my grandson picked it up some where. he saw that it was shaped very much like a human skull so he brought to my office and left and you are the first person that has ever thought it had any value, its been here several years) so I got him to let ~~me~~ me take it to a geologist and the geologist said that he had never seen anything just like it. he thinks its a meteorite and advised me to send a chip off of it to some one dealing in meteors and find out if it were one. so I am mailing you a chip off of it

Respt yours

J. G. Shelby
Lake Victor.

P.S. The rock weighs 4 lbs - 4 oz
