Gentlemen:

I got a list of your meteorite offerings from a friend of mine about a month ago.

If you have either of the largest specimens of Nuevo Mercurio, Mexico, still in stock, I would take one of them.

If these are both sold, I would still be interested in three or four of the larger remaining ones, in the \$20. to \$35.00 range, preferably broken individuals showing some interior, tho I would take one complete individual.

Let me know what you have and I will send a check.

Yours sincerely,
