

PROPOSED TERMS FOR SALE/TRADE - NWA 3137

I propose to sell the first two slices purchased at \$16.00 per gram. The purchaser can select which pieces to buy (excluding the main-mass end-cut).

I propose to sell the next three slices at \$18.00 per gram. The purchase can select which pieces to buy (excluding the main-mass end-cut).

All remaining pieces are offered at \$20.00 per gram, including the end cut, because it is special and contains the majority of the fusion crust on the meteorite.

I am open to some trades. I would consider similar (eucrite) material, but I encourage trades for different (non-eucrite) material to add to my collection and my collecting partner's collection. My partner has an affinity to collecting iron and stony-iron meteorite slices, as full slices. We both have a desire to acquire whole stones and large, full slices or end-cuts of a variety of meteorites, including ordinary chondrites.

PROPOSED TERMS FOR SALE/TRADE - NWA 3138

I propose to sell the six slices (and the main mass) at \$18.00 per gram. The purchaser can select which piece or pieces to buy.

I am open to trades on the same basis as set-out for the NWA 3137, above.
