New York, 9 July 1954

Mr. C. W. Jacob; cc M. D. Miller and Rex Smith

We should have written to Mr. Amon Carter about the air freight building to be constructed at Love Field before it was announced in the newspaper.

All of us will have to share responsibility for not getting that done. We have been talking about building this structure for a couple of years, putting it off as long as possible. I presume that we have talked about it so much that we took it to be old news and did not notify Mr. Carter.

By copy of this note I am asking Rex Smith to make it a usual procedure in his office to check with you to see that a director has been notified when something concerning American is to happen in the area in which the director is interested on account of his residence. This, of course, should be done before any newspaper release has been made.

s

C. R. Smith
